

MOUNTAIN TRAILS

Spectacular mountains rise above snow line in the equatorial region of East Africa. Included among these are Africa's highest peak, Mt Kilimanjaro (5,895 m or 19,340 ft) in Tanzania; Mt. Kenya (5199 m or 17,058 ft) just 200 miles to the north in Kenya; and the Ruwenzori range (with peaks above 5000m or 16,000 ft)--the fabled Mountains of the Moon--along the Uganda-Zaire border. Heritage Africa Organizes trips to climb these Mountains for groups and individuals. This includes accommodation planning, transport and guides to the destinations. For more information you can email us to send you more detailed information according to which mountain you have interest.
